HIGHLIGHTS The numbers in Table 1 have been revised due to benchmark changes; however, the numbers in Table 2 have not been changed, pending an update of the California population figures from the U.S. census.

California's seasonally adjusted unemployment rate for January was 7.0 percent, up from the 6.8 percent in December. A year ago, in January, the rate was 5.1 percent. During January in California, seasonally adjusted employment decreased by 14,000 over the month while unemployment increased by 29,000. The national civilian seasonally adjusted unemployment rate for January was 6.2 percent, up from the 6.1 percent in December.

Total nonagricultural wage and salary employment, not seasonally adjusted, decreased by 232,400 from 12,919,800 in December to 12,687,400 in January. As expected, the largest decrease in employment was in the trade sector with a loss of 101,000 jobs; the retail trade component contributed 94,000 to that total. All other major sectors also registered decreases: services with 50,900 fewer jobs; construction with 32,100; manufacturing with 23,300; transportation and public utilities with 11,500; government with 7,700; finance, insurance, and real estate with 5,300; and mining with 600. After adjusting the data for seasonality, increases in employment were recorded in all major sectors. Since January 1990, total nonagricultural wage and salary employment, not seasonally adjusted, has increased by 139,700, a gain of 1.1 percent over the year. During December, average weekly earnings and average weekly hours worked in manufacturing increased to $483 and 41.2, respectively.

*Because of a relatively small sample, the monthly estimates for data in Table 2 do not always appear to reflect real labor market conditions. Therefore, these figures are a three-month moving average instead of monthly data. For example, July's data are an average of May, June, and July. August's data are an average of June, July, and August.

FOOTNOTES TO TABLES

* Data not published on the 1972 SIC code. This is a new composition of the industries included or the industry is new.

** Data for 1988 and 1989 are not comparable with prior data because of the SIC code revisions (changed from the 1972 SIC code to the 1987 SIC code).

A. Does not include employers, own-account workers, unpaid family workers, domestic servants and agricultural workers. Figures for the current month are preliminary and are subject to revision.

B. Does not include force-account and government construction workers.

C. Includes all civilian employees of Federal, State and local governments regardless of the activity in which the employee is engaged.

D. Includes all employees at the city and county of San Francisco.

E. Average hours and earnings are based upon data for full-time and part-time production and related workers in manufacturing and mineral extraction industries, construction workers in construction and nonsupervisory employees and working supervisors in other industries. Average gross weekly and hourly earnings include overtime pay and premium wages for late-shift work. Attention is directed to the fact that these are not wage rates but are averages of the gross earnings. Figures for the current month are preliminary and are subject to revision.
